Services

Medical Billing Services

Submitting accurate medical claims to insurance carriers is the key to getting paid quickly and efficiently. With the constantly changing, complex medical billing and coding requirements, maintaining a healthy revenue stream has become quite challenging.

- ✔ Eligibility Verification
- ✔ Prior Authorization
- ✔ Charge Entry & Charge Audit
- ✔ Medical Coding Services & Audit
- ✔ Patient Demographics
- ✔ Remittance Processing
- ✔ Account Receivables
- ✔ Denial Management
- ✔ Credit Balance
- ✔ Analytics & Reporting

Provider Credentialing

Physicians/providers must credential themselves, i.e., enrol and attest with the Payer's network and be authorized to provide Services to patients who are members of the Payer's plans. A physician or other healthcare practitioner who wants to treat patients who are members of a certain Payer's plans must first get credentialed, i.e., enrolled and attested with the Payer's network and approved to perform the Services in question

Robotic Process Automation

In the dynamic realm of healthcare, where precision and speed are paramount, Robotic Process Automation (RPA) emerges as a pivotal technological advancement. At MedQuik Solutions, we integrate RPA to automate repetitive tasks, leveraging its capabilities to streamline administrative workflows with unparalleled efficiency and accuracy.

Telemedicine Platform

The MedQuik Telemedicine Platform is designed to streamline your clinical practice by addressing the challenges you face every day. With our platform, the hassle of back-and-forth phone calls for scheduling, the issue of no-shows due to miscommunication, and the administrative overhead of managing patient appointments are things of the past.

How are we unique from others?

Our journey of service begins where other's thoughts end. Our billing experts analyze the claims peer to peer to produce revenue from those claims that are finalized as uncollectible.

Transparent workflow system

Reduces Billing Errors
